Connection options

Top connection KA 500.2

Adjustable direkt attachment as bolted connection (welded construction, roll section, etc.)

Top connection using locking pins for installation in attachment design with precisely or larger drilled attachment holes.

For larger drilled attachment holes, the wheel block must be aligned. Subsequently, the wheel block is attached by bolts and should be drilled with the locking pins 12×30 supplied. However, this should not be done in the area of the attachment bolts or the existing adjusting pin hole [1]. Alignment is not required for precisely drilled attachment holes.

1 Set KA 500.2 comprising of:

- 8 Grub screws M20×120 - 10.9 ZT
- 8 Safety nuts M20-10 DIN EN ISO 7042 (DIN 980)
- 8 Discs 21 DIN 6340
- 4 Locking pins 12×30 DIN EN ISO 8752 (DIN 1481)

Longer locking pins are available for thicker plates.

1) Pinning is not permitted in this area!

2) Can be factory-glued in the wheel block housing on request
